

Access Reader Interface Panel (MMR) ICMMR-62E

Reference image only*

The IDCUBE's new MMR Series Serial Input/output (SIO) panels enable system expansion of MLP series intelligent controllers as part of its distributed architecture. The enhanced modules offer an improved processor and increased memory, plus feature an embedded crypto memory chip that provides a secured layer of encryption to onboard sensitive data.

The ICMMR-62E panel comprises of an Authentic Mercury MR Series Intelligent reader interface MR-62E along with optional accessories, i.e., UL certified power supply, charging circuit, battery and a tamper switch. The panel is seamlessly integrated with IDCUBE's Access360 application.

The MR62e Series 3 is an IP-enabled interface module with on-board flexibility to connect a wide range of security devices. The MR62e is easy to install and provides the required I/O for interfacing four card readers using OSDP protocol, six general-purpose input monitor points and four control relays to any Authentic Mercury series intelligent controller. The ICMMR-62E provides increased power output using PoE+ and provides one reader port supporting OSDP Secure Channel readers, including non-keypad, keypad and biometric readers.
